

For there to be a real democracy in our country, there must be a truly free press, not one that is controlled by a few large corporations who are interested in making profit above all else. The decision by Sinclair Broadcasting to make their stations air an anti-Kerry documentary right before the election shows how dangerous media consolidation is to our democracy.

As an American citizen, I object vehemently to Sinclair's use of the public airwaves to further their own agenda. They are violating their legal obligation to serve the public interest. You should do all you can to see that the media benefits and strengthens the public and not its own pockets. Thank you!
